

HH[®] SERIES

HYDRAULIC ELEVATORS

Montgomery KONE

**Quality plus Project
Management... all
at a competitive
price**

That's our formula for guaranteed value in hydraulic elevators.

A correctly designed building incorporates a variety of personal choices. Specifying correct materials and equipment is an essential ingredient in assuring immediate, as well as lasting, success for your building. At Montgomery KONE, our desire is to provide *the correct elevator!*

We challenged our engineers to re-examine every aspect of the design, fabrication, shipment and installation of Montgomery KONE Hydraulic Elevators. Their mission was to apply the same innovative thinking which they used in pioneering the many advanced technologies used in our Geared and Gearless Elevators.

The result of their efforts is an entirely new generation of Montgomery KONE Hydraulic Elevators, which includes both the HH® SERIES and MX® SERIES. Advanced features include the **mipromSM_{SL}** Logic Control...*including serial hoistway and machine room communication...* making these new generation Montgomery KONE Hydraulic Elevators the finest available.

When you specify Montgomery KONE, you maximize the return on your investment. In addition to the quality of our engineering and manufacturing, you receive the extra value of the Montgomery KONE Project Management System. This is our assurance to you that your elevator will be manufactured, delivered and installed within budget...*and on time!*

**Pre-engineering
provides
flexibility
of choice**

For over a century, vertical transportation has been Montgomery KONE's only business. Since 1892, we've tackled virtually every conceivable people-moving challenge. Our customers reap the rewards of that experience and those solutions.

- The HH® SERIES incorporates the best of Montgomery KONE pre-engineered component designs.
- HH® offers the most popular sizes and capacities to satisfy low-rise building passenger handling needs.
- HH® SERIES Elevators serve up to four landings and 31'-2" of travel depending on the model chosen.
- Speeds of 80 and 125 feet per minute may be chosen for HH® SERIES elevators.
- HH® SERIES Elevators are designed to meet ADA requirements.

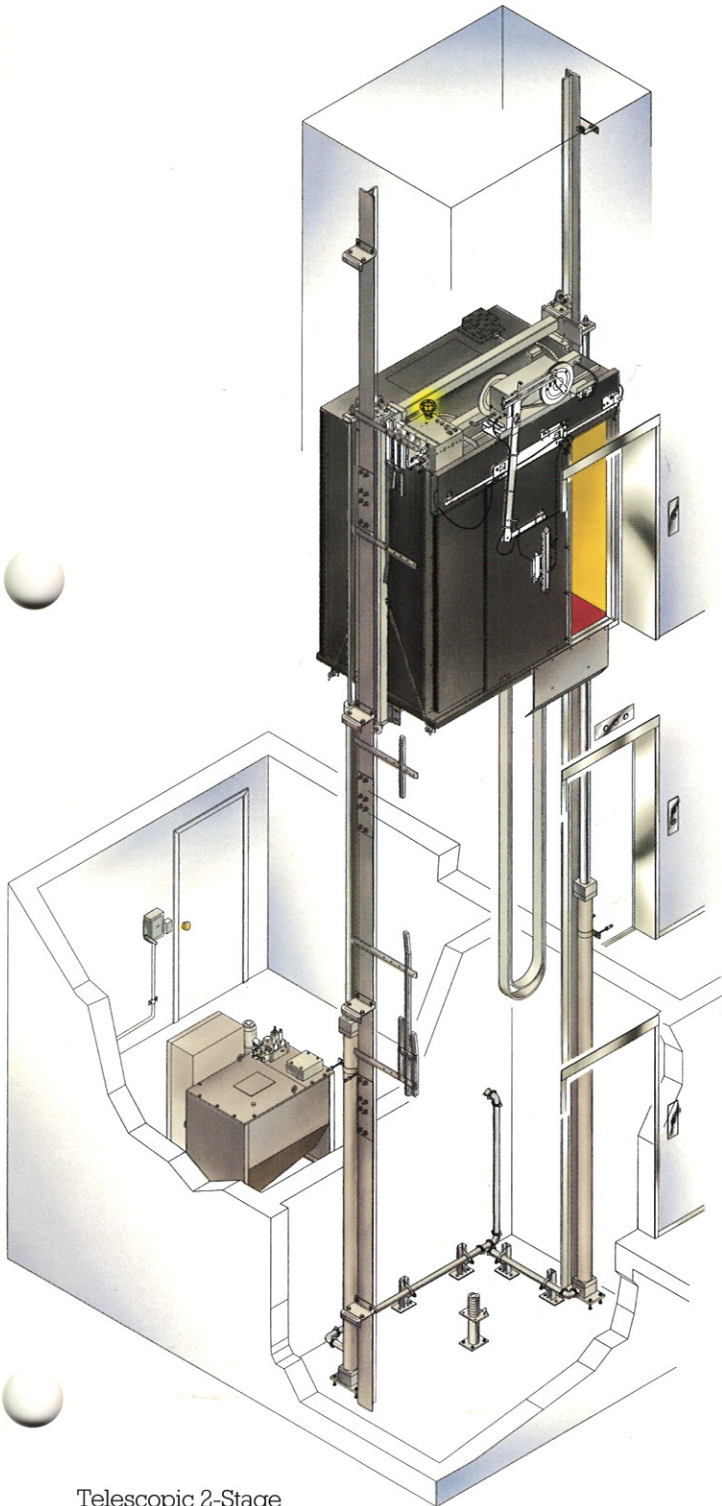

Montgomery KONE

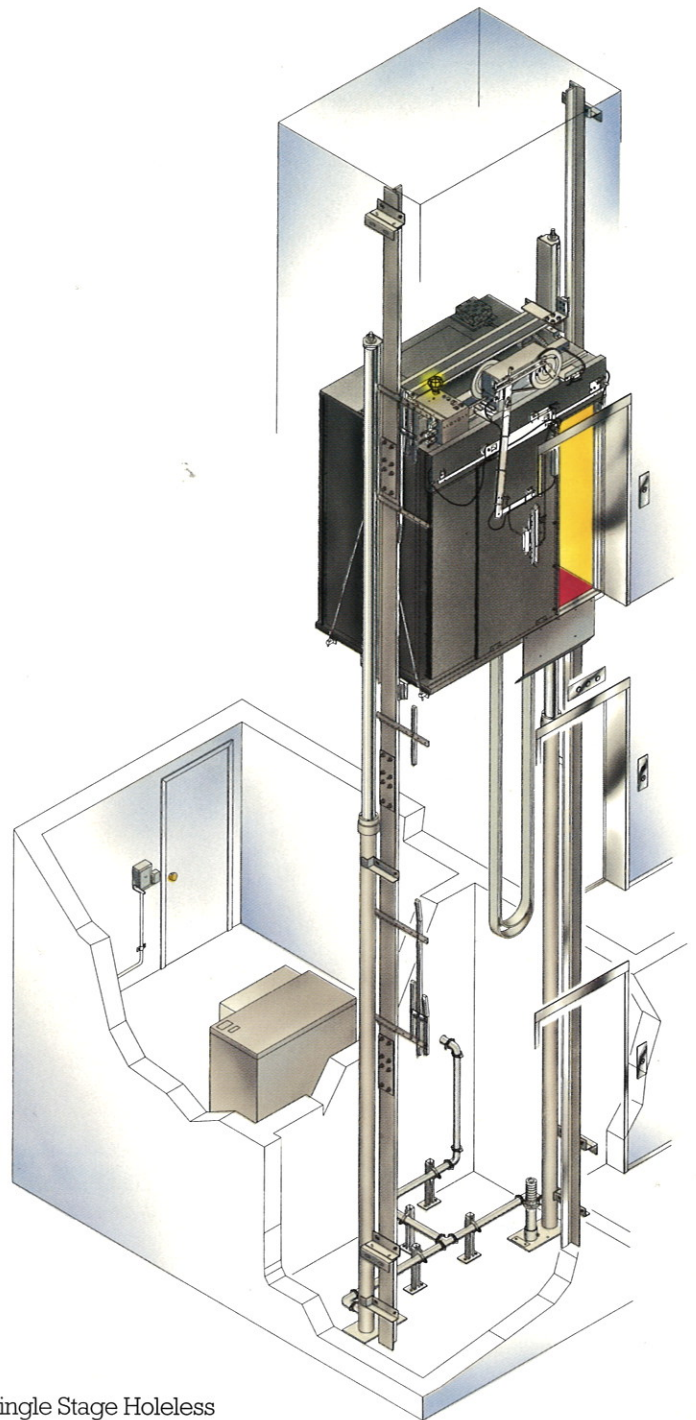

HH® SERIES

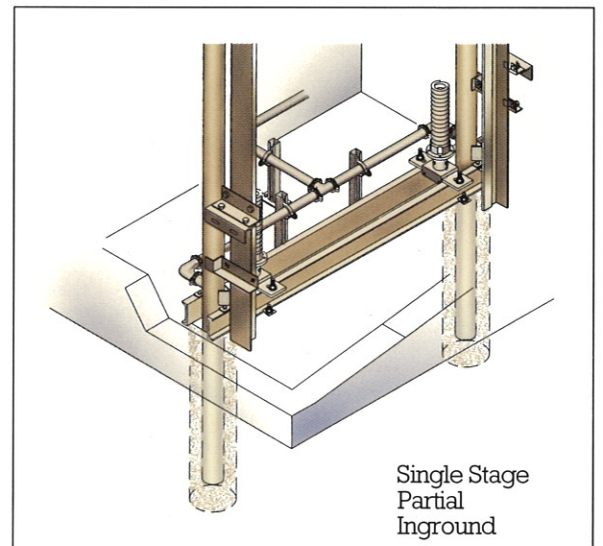

The technology contained in HH® SERIES elevators can be seen when reviewing these isometric cutaways. Knowledge engineering, coupled with scrupulous attention to quality, assures that a device of this complexity will afford our customer years of dependable service. You have that assurance of quality when you choose Montgomery KONE.

Telescopic 2-Stage
Holeless

Single Stage Holeless

Single Stage
Partial
Inground

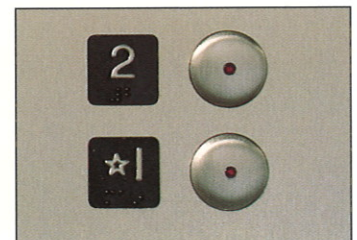

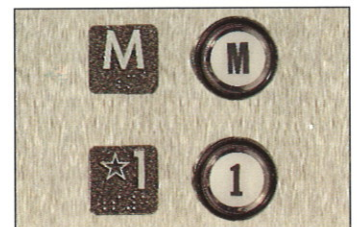

HOISTWAY ENTRANCES:

Sizes and types to complement every application. A broad spectrum of baked enamel colors is available. You may also choose brushed or mirror finishes in either stainless steel or bronze (60/40 muntz).

Nearly limitless choices help you enhance your building's unique personality

Elevators play a key role in creating the public's perception of your building. You deserve choices which project the exact image you wish. With Montgomery KONE, you can!

The HH® SERIES includes the economies of pre-engineering coupled with the broadest possible selection of architectural products, materials and finishes. You'll find that the HH® SERIES fits within virtually any architectural decor.

SIGNAL FIXTURES: Montgomery KONE's APD/Conventional Fixture design and our Tamper-Resistant Fixtures are both available with the HH® SERIES. Our attention to your needs provides signal fixtures which merge extensive design variations with traditional Montgomery KONE quality.

CEILING:
Literally thousands of ceiling design configurations and appearance variations are available for use in the STL® Elevator Cab. A majority of these choices involve use of the Island Ceiling concept unique to Montgomery KONE.

HANDRAILS:
The HH® SERIES makes available finely crafted handrails for use in the STL® Elevator Cab. Handrails are available in wood (various shapes and colored finishes) as well as stainless steel or bronze in various shapes, widths and finishes. While handrails are often a code-required item, we offer this large variety to assist you in enhancing the details.

CABS:

The HH® SERIES incorporates the uniquely designed STL® (steel) Elevator Cab. All HH® SERIES cabs are equipped with code-required visual and audible fixture devices, such as Car Direction Lanterns and

Digital Position Indicators. Pre-engineering permits efficient manufacture and installation techniques, along with materials and finishes too numerous to mention. All of this customer choice and the most competitive price, too!

**Knowledge
engineering
creates vertical
transportation
solutions**

The need for vertical transportation in some structures is obvious. Today, we also recognize that newly adopted State and Federal laws, along with certain new codes, focus special attention on vertical transportation.

Montgomery KONE's customer-driven philosophy and our 100+ years of experience have been merged to create the most advanced knowledge-based system practices. New, refined, standard component designs... configured for the best elevator solution...are the result. All of this is provided to satisfy *your specific needs*.

The dividend of

**Project
Management**

Your selection of a Montgomery KONE elevator sets in motion our industry's most sophisticated Project Management System.

When you invest in a Montgomery KONE elevator, you receive immediate dividends. *Project Management* is a highly developed set of procedures, under the supervision of your Montgomery Sales Professional. That's the person who discusses your needs, evaluates your plans, designs the specification description, prepares your proposal, assists with the approvals

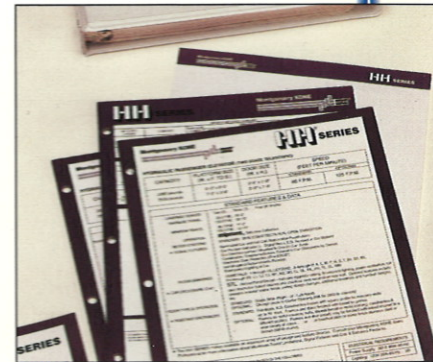

and provides the guarantee of a first-class job.

Your Montgomery KONE Sales Professional watches over the approval process and the actual manufacturing schedule. This access to scheduling information assures correct and prompt fabrication, along with appropriate shipment direct to the job site from the Montgomery KONE factory.

Our Project Management method works because of the cohesive effort of highly skilled professionals in a variety of regimens.

Your Sales Professional stays in close contact with Division Manufacturing, Branch Management and

Branch Construction Management so that arrival of the material and actual installation is in keeping with your schedule. This is how we offer the fastest lead times available!

Customer approval documents are designed to be simple, logical and easily completed. Reference documents for determination of choice are colorful, accurate and complete.

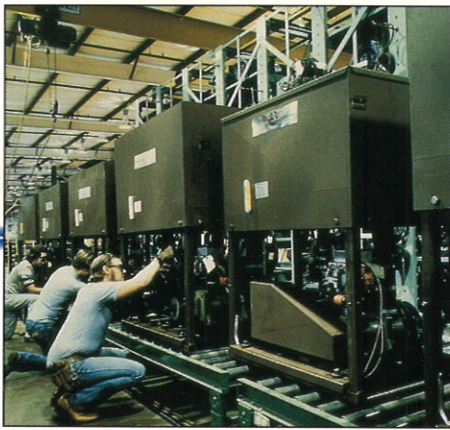

Knowledge Engineering provides the best elevator solution.

Your Montgomery KONE Sales Professional will present recommendations only after carefully analyzing your needs.

HH[®] SERIES

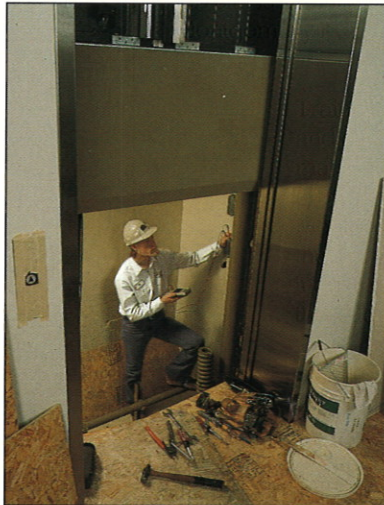

All HH® SERIES elevator components are manufactured to exacting quality standards in our own factories.

Direct, complete, careful and on-time delivery to the job site is provided by Montgomery KONE.

Training, experience and careful planning make the construction crews from Montgomery KONE the envy of the industry...they'll be there for you.

The smooth, quiet operation of your new Montgomery KONE elevator makes a positive statement about your building.

The fine-tuned quality of a hydraulic elevator from Montgomery KONE will be evident from your first ride. This quality is ensured by the craftsmanship inherent within the equipment. Plus, the HH® SERIES offers the shortest manufacturing lead time in the industry.

Continued reliability will be ensured when you take advantage of a Montgomery KONE Service Program.

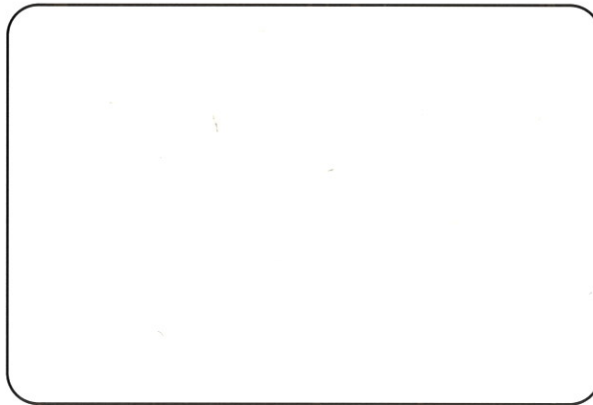

Our Service Commitment...
TOTAL CUSTOMER SATISFACTION!
